

Kyushu-Ha

We are now at the beginning of the art movement.

We have given our art movement the name "Kyushu-ha," but this is merely a regional description of our production site.

The most fundamental attitude of ours is to explore the possibilities of art to the fullest extent, eliminating all preconceived notions. From contemporary science and society to issues of ethnicity and individuality, and from a methodological standpoint as well, there is a mountain of issues around us that we must confront through art, such as realism, abstract, and un formeleur.

We, Kyushu-ha,, aim to tackle and solve these problems to create a truly unique art of our own. The goal is to create a new style of art.
